Juliet's Content Outline

Topic: Espresso drinks
Wiki page: https://en.wikipedia.org/wiki/List_of_coffee_drinks

For my microsite, I want to create a simple guide to different types of coffee drinks. The website will explore the history, ingredients, and preparation methods of popular coffee drinks. The goal is to help visitors understand what makes each drink unique and how they differ from each other.

The website will have **5 pages:**

1. **Home:** A brief introduction to coffee drinks and an overview of the different categories visitors can explore.
2. **Coffee Basics:** An introduction to common brewing methods, including espresso, drip coffee, and cold brew, explaining how each method works and how it affects the final drink.
3. **Espresso Drinks:** An overview of popular drinks like lattes, cappuccinos, macchiatos, and Americanos, including their origins, ingredients, and how they are traditionally prepared.
4. **Cold Coffee Drinks:** An exploration of iced coffee, cold brew, frappés, and other cold drinks, explaining their histories and different preparation methods.
5. **Coffee Around the World:** A look at unique coffee drinks from different cultures, such as Vietnamese iced coffee, Turkish coffee, and the Italian affogato.

I want the website to feel playful and informative, using illustrations, diagrams, and simple visual comparisons to show how drinks are made. I especially want to explore the proportions of espresso, milk, water, and foam that distinguish similar drinks. The website should feel more like a coffee encyclopedia than a recipe book.
